Argonne National Laboratory

Center for Nanoscale Materials

9700 S Cass Ave., Building 440

Argonne, IL 60439-4806

Ph.D., University of Science and

Technology of China

Research Summary:

- Design and synthesis of hybrid nanostructures with multiple functionalities and increased complexity
- Development of in-situ synchrotron x-ray techniques for non-invasive probing reaction kinetics involved in the synthesis of colloidal nanoparticles in real time
- Investigation of novel properties of the synthesized nanostructures in the context of nanophotonics, photocatalysis, sensing, and energy storage/conversion (e.g., lithium-air batteries)

Awards:

- Top 100 Materials Scientists with highest impact score (2000-2010), Rank #5, Thomson Reuters, 11/2011
- Top 100 Chemists with highest impact score (2000-2010), Rank #62, Thomson Reuters, 2/2011
- DOE's Office of Science Early Career Scientist and Engineer Award, 2008
- Presidential Early Career Awards for Scientists and Engineers (PECASE), 2007
